

TrueCommerce EDI Solutions

Integrated EDI

We make it **painless** to implement Electronic Data Interchange (EDI), the most widely used form of business-to-business electronic commerce, by making it simple and affordable.

- ✓ Total EDI solution from one, trusted source
- ✓ More than 3,000 companies improve business productivity daily with TrueCommerce EDI Solutions
- ✓ EDI compliance with your business partners using the trusted TrueCommerce Trading Network
- ✓ Coveted, prestigious status from leading business software providers
- ✓ Free, reliable and accessible customer support
- ✓ No annual maintenance fees

Easy to Use.

Our unique modular approach enables us to offer a true end-to-end solution that is extremely intuitive to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

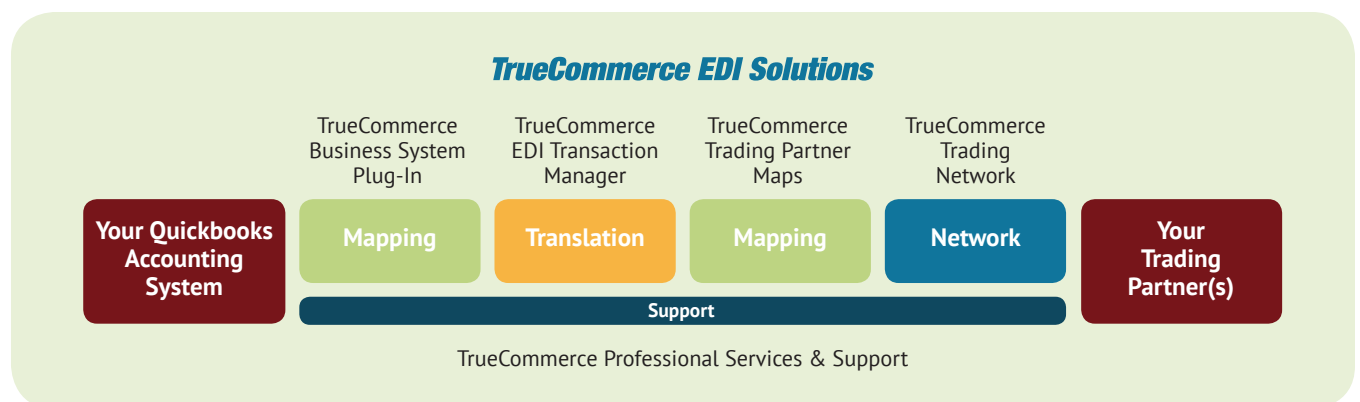

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network", or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. TrueCommerce Trading Network is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

Translation Software is required to convert the raw EDI data into a meaningful format. TrueCommerce EDI Transaction Manager™ is our user-friendly translation software that converts business documents into the ANSI ASC X12 EDI standard. In addition, it converts the data out of the standard into a meaningful format, such as a human readable business form.

Data Mapping and Integration provide the ability to seamlessly import and export information from EDI-based transactions to and from your back-end business or accounting system, as well as to properly format transactions sent to your

trading partners. TrueCommerce EDI Maps are a collection of intelligent software modules that are programmed to format your inbound and outbound transactions so they match your trading partner's requirements. To add trading partners, you simply auto-connect additional TrueCommerce EDI Maps. Our TrueCommerce Business System Plug-In™ maps your EDI transactions, so they seamlessly transfer to and from your business or accounting system. You will have one specific TrueCommerce Business System Plug-In for whatever business system you are operating. If you replace your business system, simply swap out your plug-in and the rest of your EDI solution remains intact.

Support for all of your EDI needs requires a broad range of expertise. An in-depth understanding of the specific implementation requirements of each trading partner is critical, as is a thorough understanding of the issues related to integration and the technical aspects of sending and receiving transactions electronically. Because TrueCommerce EDI is an end-to-end solution, we have teams of knowledgeable professionals supporting each and every aspect of the EDI process.

We make EDI painless by providing small to mid-tier companies with comprehensive, end-to-end EDI solutions that are easy to use, robust and affordable.

Affordable.

When it comes to EDI, TrueCommerce delivers unsurpassed value. Rather than requiring you to utilize a combination of expensive third-party providers, we deliver and support your entire EDI solution. This enables us to provide valuable cost-saving benefits that no one else can offer:

- ***Free, unlimited phone access to our friendly and knowledgeable customer support professionals!***
Available Monday through Friday, 8:00 a.m. to 7:00 p.m. EST.
- ***Free Trading Partner Map updates!***
When your trading partner modifies their EDI requirements or implements a new transaction, we'll send you an auto-installing upgrade to the associated Electronic Partner Plug-In™ (EPP) at no charge.
- ***No hidden network fees!***
Enjoy substantial savings vs. traditional VAN fees.
- ***No annual contract or annual maintenance fees!***
Cancel your TrueCommerce Trading Network subscription at any time if not completely satisfied.
- ***Advance Ship Notice (ASN) module included!***
For added functionality, purchase TrueCommerce Electronic Labeling Plug-In™ and auto-generate UCC-128 numbers.

More than 3,000 customers use TrueCommerce EDI Solutions to exchange tens of millions of EDI transactions annually within a variety of industries, ranging from retail and banking to healthcare and government.

System Requirements:
Operating System - Windows® 2000,
Windows Server 2003, Windows Server 2008,
XP and Vista Processor - Minimum 2 GHz

RAM - Minimum 1 GB

Minimum free hard disk space -
3 GB (available)

Broadband Internet Connection

IIS for Client/Server installation

Microsoft SQL Server Express Edition
(provided by TrueCommerce)
or Microsoft SQL Server 2005

As the only EDI platform to earn “preferred” status for QuickBooks Enterprise and a Gold Developer for QuickBooks Pro and Premier, only HighJump TrueCommerce EDI Solutions can provide all of the following benefits:

Single Source Solution

- Everything you need to successfully implement EDI from one source!
 - translation software
 - data mapping
 - technical support
 - accounting system integration
 - network services

Easy to Use

- As intuitive to use as email.
- Point-and-click functionality.
- Requires little or no training to begin using.
- Includes a step-by-step user’s guide that’s written in easy-to-understand language and incorporates screen captures to guide you through most tasks.
- Backed by free support!

Works with Any Trading Partner

- Including those requiring the use of AS2 or a specific Value Added Network (VAN).

Robust Functionality

- Supports any ANSI ASC X12 transaction.
- Can be installed on an individual desktop, or on a server to allow multiple, simultaneous users.
- Available scheduler enables an automated approach to handling common tasks such as sending, receiving, importing and exporting transactions and backing up data.
- Item ID translation tables and default information lookup tables included to reduce or eliminate manual data entry.
- Automatically send, receive and view acknowledgments confirming transactions are received.
- Includes Microsoft® SQL Server Express.

Generate Advance Ship Notices

- ASN module included at no additional charge!
- Barcode printing module available to automate the generation of UCC-128 labels.

Affordable!

- Annual network savings of 30% to 50% compared to EDI solutions offering comparable functionality.
 - No annual subscription or maintenance fees!
 - No annual contract required or early termination fees!
 - No AS2 license fees, mailbox fees, peak hour surcharges, delimiter conversion fees or other hidden service fees!
 - Free software updates! If your trading partner changes a specification or adds a transaction, we’ll update your data mapping at no charge!
 - Free unlimited support!
